Stata in R/Quatro

me

Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see https://quarto.org.

Running Code

It also enables you to run Stata code!

```
display 1 + 1
```

2

You can add options to executable code like this

```
sysuse auto
scatter price mpg
```

(1978 automobile data)

But of course, you can also create tables

	price
mpg	-294.2***
	(-5.28)
foreign	1767.3*
	(2.52)
_cons	11905.4***
	(10.28)
N	74

t statistics in parentheses * $p < 0.05$, ** $p < 0.01$, *** $p < 0 > .001$
